
Manager and TeamMember add no attributes. Both inherit username and password from User
User
- username: String
- password: String
+ login(username, password): boolean
+ getUserDetails()
+ isManager(): boolean
Manager
+ createProject(name, description, startDate, dueDate): Project
+ editProject(project)
+ getProjects(): List
1
manages
0..*
TeamMember
+ updateTask(task, newStatus)
overallProgress is derived: percent of this project's tasks that are Completed
Project
- projectId: int
- name: String
- description: String
- startDate: Date
- dueDate: Date
- /overallProgress: int
+ validateDetails(): boolean
+ getProgress(): int
+ refreshProgress()
0..*
works on
